MASSARAT
MY LEARNING PATHWAYS

"Massarat is the world's 1st aggregator of K12 educational data."

For Educators

Do you want to create and grade diagnostic, formative and summative assessments in minutes, instead of hours?

Do you want to customize and personalize your assessments to match your classroom dynamics instead of teaching to a standardized test or an external assessment?

Do you want to be able to quickly and easily identify which learning objectives landed well with your students and which did not?

For School Leaders

Do you want to quickly and easily see how your school is performing against other schools, overall or in a specific subject or across a specific grade in real-time throughout the school year whenever you need to?

Do you want to automatically turn your school's internal assessments into internationally benchmarked assessments?

Do you want to save your teachers' time so they can focus on what they need to do instead of spending long hours on tedious, time consuming tasks?

Do you want to consolidate your school's and student data into 1 central repository where you can have all the information you need at your fingertips?

Do you want to differentiate your school from the competition and attract more students?

If you want to have all the above AND make money for your school too, then please give us a call.

MASSARAT
MY LEARNING PATHWAYS

Who we are?

Massarat is a cloud-based platform that centrally collects 1000s of datapoints from all participating schools. With blended learning and remote teaching capabilities, the platform interconnects all elements of the educational data ecosystem and couples them with our powerful analytics engine. All this data is stored, categorized and benchmarked. By utilizing the latest advances in data-science, cloud computing and big data analytics, Massarat provides all stakeholders with detailed, deep insights in real-time so they can make informed, data-driven decisions whenever they need to.

Assessment Module

Our patented assessment module collects every question presented by the teachers and the answers of every student to these questions. We then provide the globally benchmarked results to all stakeholders throughout the school year, instantly turning every-day quizzes into internationally benchmarked assessments.
